

URBAN WILDLIFE CHRONICLES EGUIDE

ROCK PIGEONS

HOW TO SPOT ME?

- Look in city squares, under bridges, on rooftops, and in parking lots—we love urban ledges and open spaces.
- Most pigeons are gray with iridescent green and purple neck feathers, but we come in many colors.

DID YOU KNOW?

Pigeons are incredible navigators—they can find their way home from hundreds of kilometers away using the Earth's magnetic field, sun position, and even smell!

HOW TO PROTECT ME?

- Avoid feeding pigeons processed foods—bread and fries aren't good for us!
- Support humane pigeon management practices in urban areas.
- Share positive stories—pigeons are often misunderstood but play a role in urban ecosystems.

REFLECTION PROMPT

What's something common in your everyday world that you could look at with fresh eyes?
